HOBBIE

Avid tea lover, Passionate about the culinary arts, Find joy in cooking, I love spending time with friends during my free time.

ABOUT

I'm Kumari Kirti Jha, a dynamic and passionate 2nd-year BCA student at Lovely Professional University, where I'm honing my skills in the world of technology. Armed with a robust foundation in Programming Languages such as C, C++, HTML, CSS, and JavaScript, I'm on a journey to decode the language of computers. But that's not all – I'm also well-versed in Bootstraps, Git & GitHub, DOS, Visual Basic, and Basic (GW-Basic & Q-Basic). Creativity is my forte, extending beyond code. I wield tools like Adobe Photoshop, Corel Draw, and Adobe PageMaker to craft digital masterpieces. Additionally, my proficiency in the Paint Program adds a touch of artistic flair to my skill set. On the business end, I navigate through the realms of MS Office – mastering MS PowerPoint, Excel, Word, and Access. Numbers find their harmony with my expertise in Tally. Ready to conquer the tech world, I bring a perfect blend of technical prowess, creativity, and business acumen. Let's code the future together!
